About this map

This map is the result of a global initiative by researchers for researchers to give shape to the emerging practice of ResearchOps. It's our V1.

It's the result of the analysis of data gathered via a survey and 33 #WhatisResearchOps workshops that ran around the world.

The map's intention is to give a framework for what ResearchOps is. As the practice grows, we expect this map will grow and be refined too.

What about data security, privacy, and procurement?

Data security, privacy, and procurement should be considered in every ResearchOps element you deliver. They're ubiquitous; we've therefore not set them out as discrete elements.

Consider both quantitative and qualitative needs.

The needs of quant and qual are sometimes different; consider this in delivering each ResearchOps element. For simplicity, we've not illustrated this throughout the map; take it as given.
